

BlueCross BlueShield of Tennessee Real-Time Adjudication

In support of our overall Consumer Directed Health Plan (CDHP) strategy, BlueCross BlueShield of Tennessee has developed a **FREE** web-based tool available for providers at the point-of-care. Today, this tool can:

- Estimate patient liability **before** the point-of-service.
- Determine accurate patient liability at the point-of-service through **Claim Estimation** or **Claim Submission** online, real time.
- Reduce administrative hassles such as balance billing and refunds and help reduce confusion at the point-of-service.

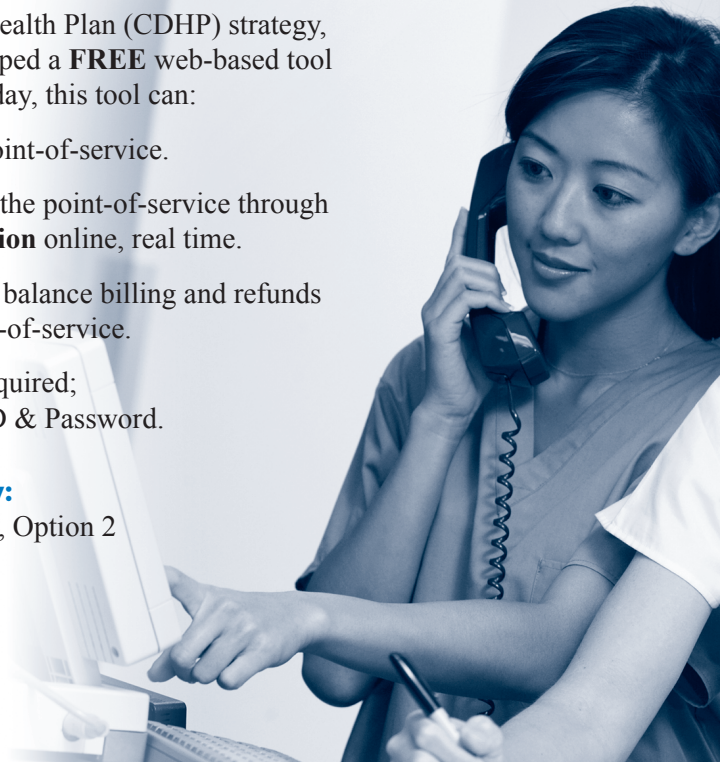

Note: No additional hardware or software is required; only Internet access and a BlueAccess ID & Password.
