Urgent Care Centers

(Listed alphabetically by county)

Specialties are listed alphabetically under each county)

At times you may need health care at night or on weekends. You might need to go to an Urgent Care Center. Urgent care is care that is important, but not life-threatening. Urgent care health problems are usually marked by rapid start of constant or unusual pain linked to an illness. If you need urgent care, call your doctor or specialist. Many doctors' offices use an answering service after hours. When you call after normal office hours, be ready to explain your symptoms. Leave a number where the doctor can call you back.

Urgent care situations include:

- › Hard time breathing
- › Nose bleed that lasts for a long time
- › Short-term high fever
- › Cuts needing stitches

Remember

A provider's status may change at any time. This list is as correct as possible at the time of printing.

To make sure a doctor or facility is in your network:

- › Go to **bcbst.com**. Log in with your username and password. Select **Find Care & Estimate Costs**. Enter your starting location and then search for your provider by specialty, name or procedure through the search bar or browse through our explore options.
- › Download the BCBSTN app on your smartphone from the Apple App Store or Google Play, then enter the information from your Member ID card.
- › Call us at the Member Service number on the back of your Member ID card.

Retail Convenient Care Clinics

There are health clinics located in some pharmacies in your network. These clinics are quick and conveniently located, and they're less expensive than a hospital ER.

These clinics are usually staffed by nurse practitioners and physicians' assistants. They give fast care for common conditions like sinus infections, or minor illnesses or injuries.
